

To Whom It May Concern:

CE marking / Declaration of Performance (DoP)

Flexalen Piping Systems

CE mark

The **CE** mark is part of the EU's harmonisation legislation. The CE marking indicates that for instance a construction product is in conformity with its declared performance and that it has been assessed according to a harmonised European standard EN or a European Technical Assessment (ETA) has been issued for it. Not all products must have CE marking and not all EN standards are harmonized yet.

Declaration of Performance (DoP)

The Declaration of Performance is a key part of the European Construction Products Regulation (CPR). It provides information on the performance of a product. Each construction product covered by a European harmonised standard or for which a European Technical Assessment has been issued needs this Declaration and must be CE marked.

Thermaflex piping systems are not subject to a harmonized European EN Standard and therefore do not carry the CE mark and no Declaration of Performance is issued. Thermaflex has "Declaration of Conformity" (DoC) documents issued by notified bodies according European EN and/or ISO standards depending on the product.
