THERMAFLEX®

# Sustainable Insulation & Pre-insulated Solutions

## About us

Thermaflex is a global company, headquartered in the Netherlands, with 4 production locations, sales offices and distribution partners worldwide. We develop and produce high-quality sustainable insulation and pre-insulated piping solutions that help clients save energy and extend the system lifespan. Our goal is to help minimize energy waste and optimize the use of natural resources.

## Why choose Thermaflex?

Eco-friendly solutions for energy efficiency and contribute to CO2 reduction.

Expert guidance from design to installation for optimal system performance and worry-free projects.

Durable, high-performance products for long-term reliability across applications.

### Pre-insulated Piping System

Flexible, lightweight, durable, all-in-one pipes for heating & cooling networks, domestic water and geothermal energy distribution.

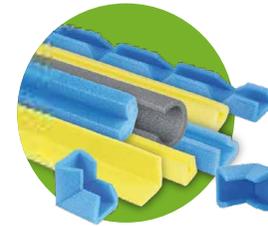

### Pre-insulated Ducting System

Thermal and acoustic insulation combined in one prefabricated solution. Zero failure costs and fast installation in combination with all HRV units and heat pumps without outdoor units.

### Insulation Solutions

High performance PE insulation products for heating & cooling, ventilation and refrigeration. Custom solutions for industrial applications.

### Protection Solutions

High mechanical strength, lightweight, durable, shock-absorbing, recyclable PE foam customizable for packaging, storage and transport.
