

THE OBEROI RAJVILAS INDIA

Flexalen in one of the best hotels in the world

Pre-insulated
Flexalen pipes

Certificates

OBJECTIVES

1. Guest satisfaction throughout optimized air conditioning,
2. A reliable and durable water supply over the wide landscape of the hotel area,
3. Fast and easy installation, with minimal disturbance for guests and surroundings.

PROCESS

This project was planned together with the technical support of Thermaflex Austria in Vienna. Because of special trainings for employees in India and with optimal support during the construction phase, it was possible to meet the deadline.

RESULTS

7.1 km of Flexalen pipes for outdoor domestic cold & hot water and 1.6 km indoor for chilled water for air-conditioning were installed in 3 stages. This was realized with minimal time, and minimal hassle, so that the hotel could minimize downtime, and ensure a comfortable stay for its guest.

PROJECT INFORMATION

📍 Jaipur, India
